Quantity 2 Antminer S9

WTT Tokens, Qty 43,245 representing an investment of \$49,731.75

2019 JAN 28 PM 1:59

I believe the company has been forced into bankruptcy as a result of unreasonable and prolonged delays in the permitting process. I believe the delays may have been intentional and are masked by gross negligence and incompetence on behalf of the Grant County Permitting and Electrical Services Planning of the Public Utility District and their intent from the beginning has been to run GigaWatt out of business. As I understand they actually installed a switching station and then were forced to tear it down and rebuild it.

I believe Giga Watt deserves every consideration in its request for leniency and an opportunity to establish itself as a profitable entity. I also request that I be allowed to retrieve all of my equipment from the Giga Watt facilities, that it be made available for pick up at their facility at the earliest possible convenience.

Sincerely,

A handwritten signature in black ink, appearing to read "Ken McCoy", written over a horizontal line.

Ken McCoy,
